The harmfulness of imitation products

ISO 9001 International Quality System Certification Enterprise

ISO 14001 International Environmental System Certification Enterprise

Compliant with the EU ROHS environmental directive

Compliant with the EU REACH regulation

# Electronic maintenance product series

Sunny Falcon new materials (GuangDong) Co., Ltd have advanced testing equipments, and cooperate closely with internationally renowned additive companies and various industry associations, to keep testing accuracy and equipment advancement. Our company strictly follows the ISO9001:2015 quality management system, ISO4001:2015 international environmental management system requirements for research and development, production and other processes management. Our products have passed ROHS, REACH and other related certifications, applies to different industry conditions, in line with various industry regulations. And we will dedication to customers with high-quality new products and new application concepts at the fastest speed.

The actual use effect of the products in this manual may vary depending on the environment in which they are used. The company does not guarantee it. And we expressly disclaims any implied warranties of merchantability or reasonableness for any particular purpose. The company reserves the right to modify the manual, and have the right to make changes to this manual at any time without notice to anyone. The information in this manual is subject to change without notice.

Sunny Falcon new materials (GuangDong) Co., Ltd

PRODUCT INTRODUCTION

530 ELECTRONIC CLEANER

Features:  
Completely volatilizing, leaving no trace, no corrosion on plastic and metal surface;  
Good safety performance, the deformation of the aerosol cans and the bursting pressure all accord with the national standard;  
Environment-friendly products, comply with EU ROHS environmental directive.

Directions for use  
Keep the tank vertically sprayed; When cleaning the screen, it should be sprayed on the dust-free cloth and then wipe; You can connect a spray pipe if you want to spray to the inside or small hole of the object.

530II ELECTRONIC CLEANER(QUICK DRYING)

Features:  
Volatile fast, improve efficiency and save time;  
Good safety performance, the deformation of the aerosol cans and the bursting pressure all accord with the national standard;  
Environment-friendly products, comply with EU ROHS environmental directive.

Directions for use  
Keep the tank vertically sprayed; When cleaning the screen, it should be sprayed on the dust-free cloth and then wipe; You can connect a spray pipe if you want to spray to the inside or small hole of the object.

OPICAL MIRROR LENS CLEANER

Features:  
1.Quickly wash away dirt, grease, dust, and stubborn stains from objects to remove static electricity. Used for cleaning mobile phones, computers, precision instruments, electrical components, and circuit boards.  
2.Non destructive blue light cleaning, completely volatile, leaving no trace, and non corrosive to most plastic and metal surfaces.  
3.No irritating odor, easy for operations to accept.

Directions for use  
Spray on wiper and wipe after penetration; If it's necessary to penetrate into the interior or gaps of an object, a nozzle can be connected for use.on the dust-free cloth and then wipe; You can connect a spray pipe if you want to spray to the inside or small hole of the object.

GASKET REMOVER

Features:  
Excellent dissolving properties, quickly remove OCA sol, double sided adhesive, non-dry adhesive, etc.  
Volatilize fast, no residue, no corrosion on metal surface;  
Environment-friendly products, comply with EU ROHS environmental directive.

Usage method  
Spray the product directly on the surface need to be cleaned, From the workpiece surface about 15-20CM, vertical or inclined to the workpiece surface into a 45 degree angle spray. You can connect a spray pipe if you want to spray to the inside or small hole of the object.  
Residue can be cleaned thoroughly with Falcon 530 or 530II cleaner.

CURVED SCREEN GLUE CLEANER

Features:  
Strong dissolving ability, non-corrosive;  
Does not affect the screen, does not affect the polarizing light;  
Environment-friendly products, comply with EU ROHS environmental directive.

Usage method  
Spray vertically against the interface need to be cleaned; You can connect a spray pipe if you want to spray to the inside or small hole of the object. Wipe it 30 seconds later with wiper; Residue can be cleaned thoroughly with Falcon 530 or 530II cleaner.

893 SCREEN ASSEMBLY GLUE CLEANER

Features:  
Strong dissolving ability, the effect of removing glue is good.  
Does not affect the screen, does not affect the frame;  
Environment-friendly products, comply with EU ROHS environmental directive.

Usage method  
Spray vertically against the interface need to be cleaned; You can connect a spray pipe if you want to spray to the inside or small hole of the object. Wipe it 30 seconds later with wiper; Residue can be cleaned thoroughly with Falcon 530 or 530II cleaner.

880 LEAD-FREE ENVIRONMENTAL PCB BOARD CLEANER

Features:  
Excellent removal of rosin, solder, flux and other residues, Suitable for PCB circuit boards, ect.  
Low conductivity and minimal impact on electronic components;  
Can completely volatilize and dry naturally without leaving traces;  
Environmentally friendly products, does not contain toxic substances such as toluene, and complies with EU ROSH environmental protection directives.

Usage method  
This cleaning agent is used together with ultrasonic machine to clean PCB grease flux ( Rosin type, no-clean type, water soluble), after used about 4-6 minutes, Rinse with water and then dry in a dry box, drying oven set 65 degree, dry for 4-6 minutes.

OCA REMOVER

Features:  
This product is suitable for repairing burst screens on smart touchscreen phones such as iPhone, Samsung, Huawei, Xiaomi, etc; Can quickly remove OCA adhesive from the surface of LCD and functional chips. Quick removal, no residue, and no damage to the LCD screen; Can quickly remove OCA adhesive from the surface of LCD and functional chips.

Usage method  
Instructions: Spray appropriate amount of this product on the surface of the glue for 3-5 seconds, and when the glue is completely dissolved, gently scrape it off with a blade or wipe it off with a dust-free cloth.

CPU GLUE REMOVER

Features:  
It can quickly and effectively decompose and remove adhesive substances such as glue and paint solidified on the surface. Remove Glue Quickly, No Residue, Low Odor, Environmentally.

Usage method  
1. Remove the CPU and first use a soldering iron to remove the high-temperature tin on top.  
2. Soak the CPU in an appropriate amount of the glue cleaner for 15-30 minutes;  
3. After the time is up, take it out and brush it clean with a brush.

CAMERA NON-REMOVABLE CLEANING AGENT

Features  
Environmentally friendly, transparent, colorless, odorless, non flammable, rapidly evaporating, and residue free. Suitable for cleaning and repairing mobile phone cameras; Efficiently clean camera water-marks, spots, dust, etc; Without damaging camera components or blue light, quickly restore camera clarity.

1. Pour the liquid into a single frequency ultrasonic device for cleaning, set the frequency to 30 or 50, and keep the water level above the camera
2. Place the camera upright inside the ultrasonic wave and swipe back and forth. After 10-20 seconds, it can be removed
3. Place the camera upright on the tray and wait for 3 minutes before testing
4. If it has cleaned multiple cameras, pause for 10 minutes and wait for the solution to cool and filter before continuing to reuse; If not filtered in time, other objects in the liquid can damage blue light.

Product Specifications: 1 KG

857 SPECIAL TESTING AGENT FOR ELECTRONIC COMPONENTS

Features:  
Suitable for testing of thermal intermittent equipment/ lab test/ sensitive parts/ electrical/ integrated circuit board;Fast cooling speed, can make the part surface temperature dropped to -60 degree at once, so as to detect the fault;Environmental-friendly products, excluding CFC and HCFC, harmless to plastic, rubber and metal, the surface will not wear or scratch materials;Non-combustible, non-residual, non-conducting, no effect on current properties.

Usage method  
About 15-20cm away from the workpiece surface, vertical or tilted to the workpiece surface at the optimal Angle of continuous injection. You can connect a spray pipe if you want to spray to the inside or small hole of the object.

Q1\Q2\Q3 ELECTRONIC GLUE

Features:  
Suitable for all kinds of material bonding, frame, bracket, glass back cover, screen change, etc.  
low odor, no turning white, no corrosion, high viscosity;  
Good temperature resistance, waterproof and moisture-proof, fast curing, long shelf life.  
Product Specification: Q1/15ML, Q2/50ML, Q3/80ML  
Colour:Each type have two colors: black/ transparent

WIPER

Features:  
Soft texture, sealing incision without chip, tough and durable;  
Good dust removal effect, anti-static function;  
Good water absorption, providing adequate dry and wet strength.  
Product Specification: 120 PCS/200 PCS/ 360 PCS/ 400 PCS/ 100 PCS
